

HP-250B Automatic Small Paper Red Pocket Bag Envelope Making Machine

HP-250B full automatic pocket envelope making machine is suitable for producing pocket envelope, open-end envelope and similar paper bag.

The seam of envelope can be made at the middle or at the side, besides the small flap can be under the big flap, or above the big flap.

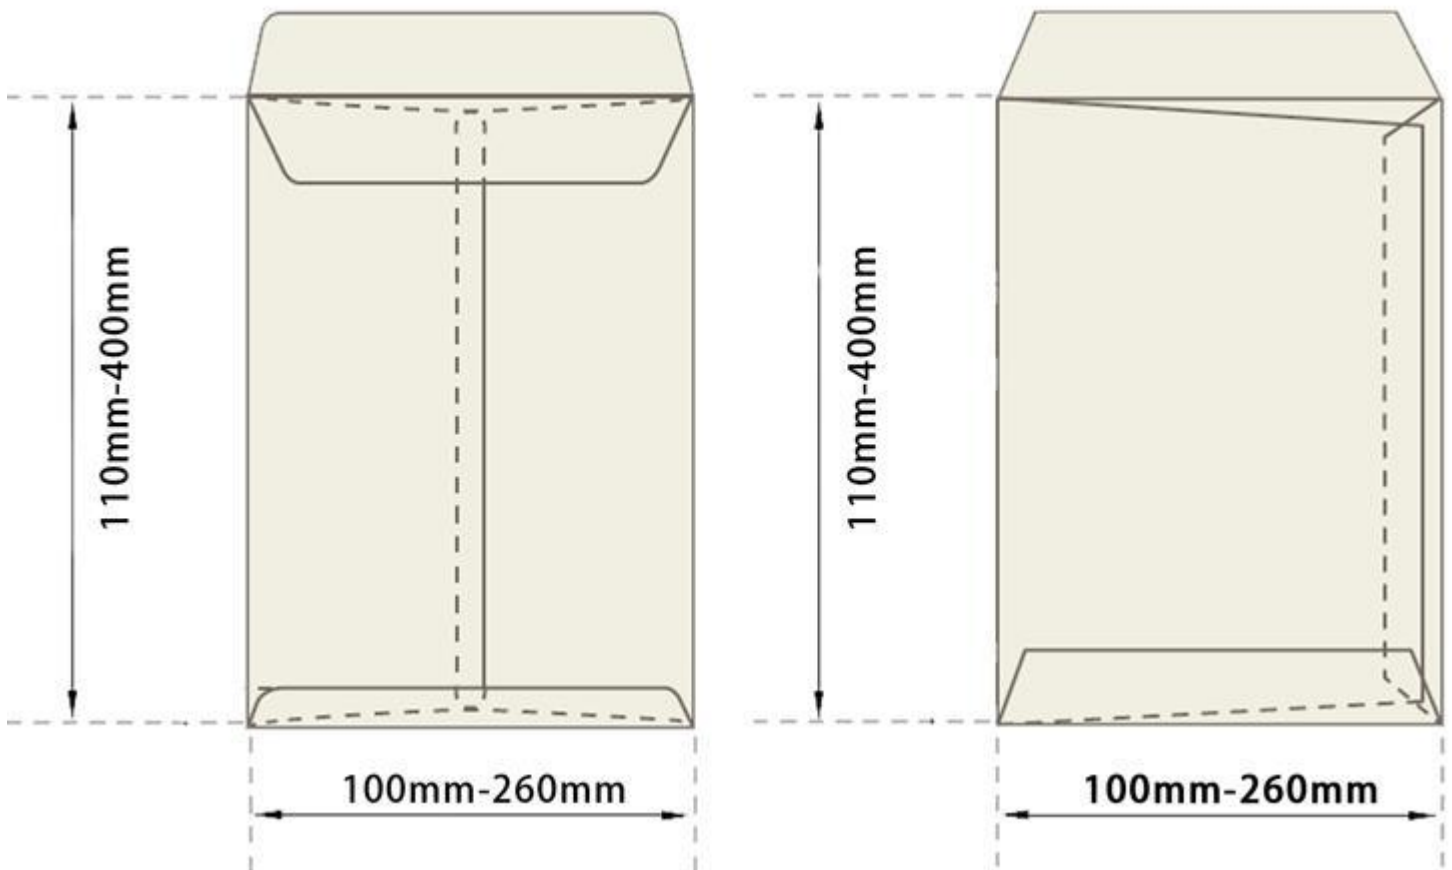

It is characterized by Reliable sheet separation of the air-suction bottom feeding system, Customer can feed blank envelope with no-stop. Then it provides the folder structure with the air-suction barrier for the stable and rapid performance. Rotary gluing structure ensures the evenly gluing, At the end, counting structure for finished envelopes.

- Reliable sheet separation
- No-stop feeder
- Easy regulation and paper positioning, accurate paper positioning
- Ensuring under high speeds.
- High quality electronic parts.
- High Production efficiency.
- Operator Friendly.

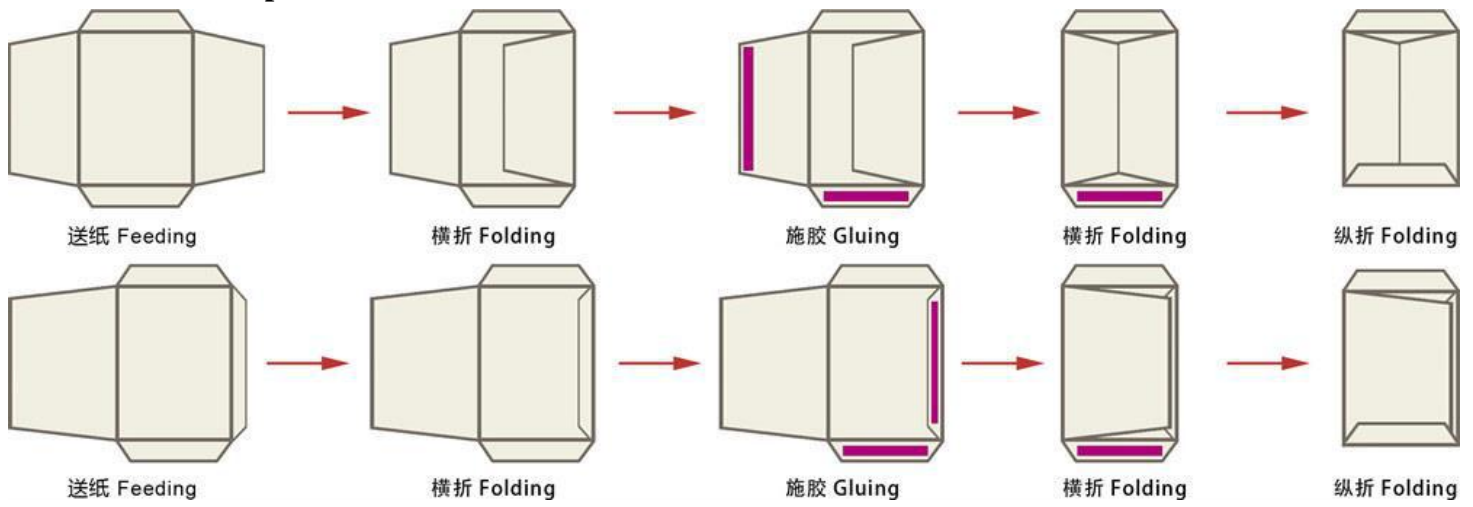

SHANGHAI EX. EXPORT INTERNATIONAL INDUSTRY CO., LTD

Model	HP-250B
Paper weight	60 gram - 150 gram
Capacity	4000 - 10000 pieces/hour
Size range of envelopes	Min.100mm x 110mm Max.260mm x 400mm
Total power	6.0 kw
Machine weight	1800kg
Machine size	2800x1150x1400 mm
