

HP-250D Full Automatic Pocket Envelope Making Machine

Product description

HP-250D full automatic pocket envelope making machine is suitable for producing pocket envelope, open-end envelope and similar paper bag.

The seam of envelope can be made at the middle or at the side, besides the small flap can be under the big flap, or above the big flap.

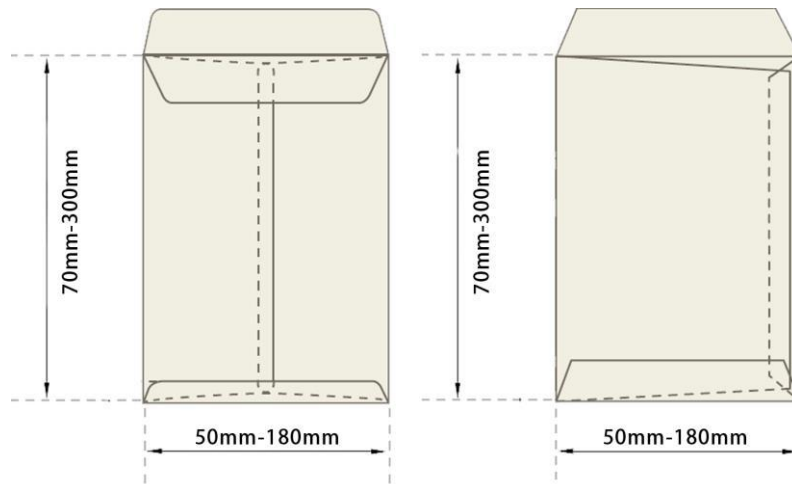

It is characterized by Reliable sheet separation of the air-suction bottom feeding system, Customer can feed blank envelope with no-stop. Then it provides the folder structure with the air-suction barrier for the stable and rapid performance. Rotary gluing structure ensures the evenly gluing, At the end, counting structure for finished envelopes.

1. Reliable sheet separation
2. No-stop feeder
3. Easy regulation and paper positioning, accurate paper positioning
4. Ensuring under high speeds.
5. High quality electronic parts.
6. High Production efficiency.
7. Operator Friendly.

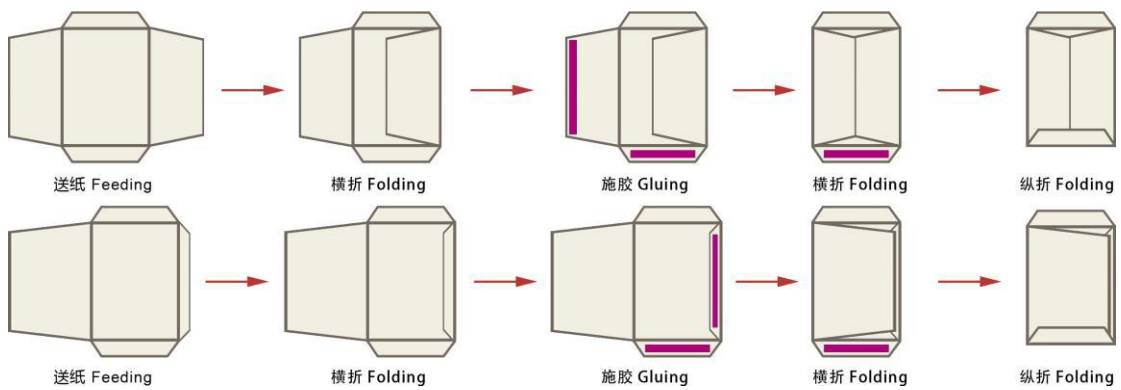

Technical parameter

Model	HP-250D
Paper weight	38 - 200 g/m ²
Output per hour	4000 - 12000 pieces
Size ranges envelopes	50x70 mm - 180x300 mm
Connected load	4.5 kw
Weight	1300kg
Dimensions	2200x950x1300 mm
