

QZD-600W Automatic Folding Box Side Wall Forming Machine

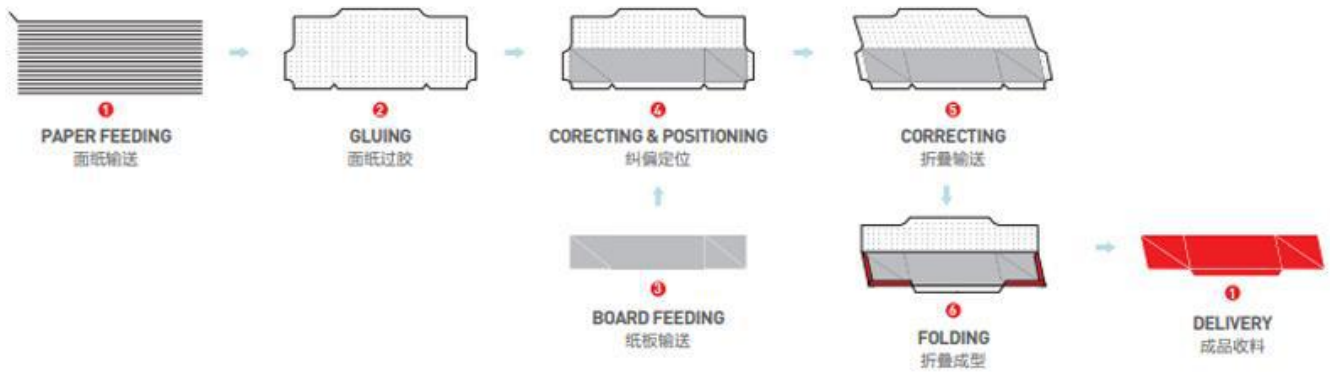

The machine adopts new technologies and technologies such as servo drive, photoelectric positioning, servo correction, servo plug-in, hemming, etc. to automatically complete the face paper Conveying. gluing, cardboard conveying, positioning, edging and folding forming and other processes. Greatly reduce transportation costs, reduce storage space, and bring good benefits to customers.

At present, in the market, high-end packaging boxes are all three -dimensional boxes. In transportation projects, they are bulky and costly. and they are easily damaged by extrusion. In response to this situation, We developed QZD-600-5 automatic folding box side wall forming machine. The machine adopts new technologies and technologies such as servo drive, photoelectric positioning, servo correction, servo plug-in, hemming, etc. to automatically complete the face paper Conveying. gluing, cardboard conveying, positioning, edging and folding forming and other processes. Greatly reduce transportation costs, reduce storage space, and bring good benefits to customers.

PRODUCTION PROCESS

MAIN TECHNICAL PARAMETER

| MODEL | | QZD-600W | |
|----------------------------|------|------------------------|------------------------|
| Length of paper | 纸张长度 | 190-1030mm | 190-1030mm |
| Width of paper | 纸张宽度 | 100-460mm | 100-630mm |
| Thickness of paper | 纸张厚度 | 80~200g/m ² | 80~200g/m ² |
| Thickness of Board | 中板厚度 | 1-3mm | 1-3mm |
| Side plate thickness | 侧板厚度 | 0.5-3mm | 0.5-3mm |
| Length of finished product | 成品长度 | 150-900mm | 150-900mm |
| Finished product width | 成品宽度 | 40-200mm | 40-300mm |
| Position precision | 定位精度 | ≤ ±0.25mm | ≤ ±0.25mm |
| Speed | 速度 | 0-35pcs/min | 0-35pcs/min |
| Weight | 整机重量 | 4000kg | 4000kg |
| Dimension | 整机尺寸 | L7000×W2600×H1750mm | L7000×W3000×H1750mm |
