ZH-D Series High Configuration Crash Lock Bottom Folder Gluer

ZH-800D/900D/1000D crash lock bottom folder gluer machine is similar to the structure of ZH-800G, but it adds 3 new parts, listed as follows.

1. Use roller belt running structure, make the paper more stable.

2. Add a pre-press part to folding part, which makes paper feeding more stable.

3. Collection part adopts waiting function; the motor speed is controllable, so it' s more reasonable to collect boxes.
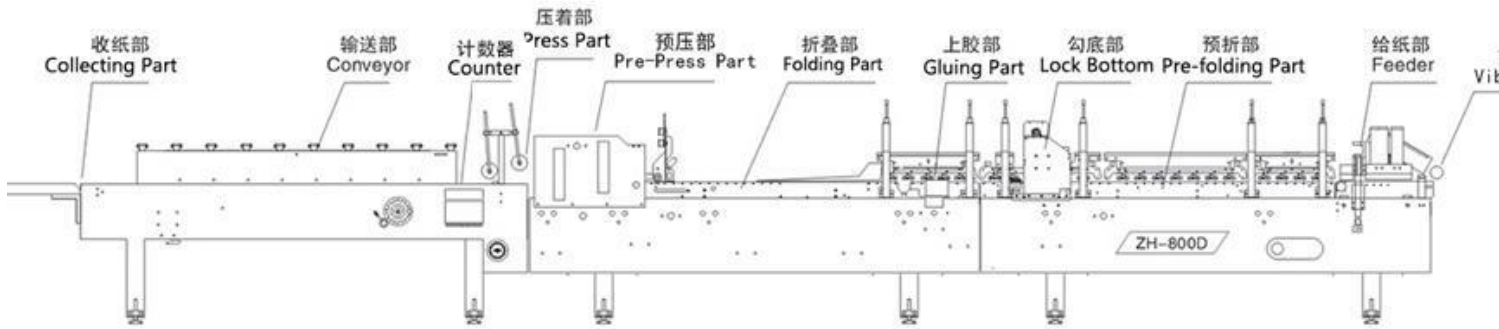

Product Description:

1. Line speed: 0-220m/min continuous adjustment.

2. Usage paper: 200~ 800g/m2 Paperboard

3. The form of pasting box: Either side folds, the both sides pre -fold and either side glue, bottom glue.

4. Paperboard feeding: Automatic feeding

5. Way of folding: One, Two and four fold 180, three fold 135°.

6. Binder: Dissolve the type

7. Speed: 6000c/min

8. Electric: 3P 380V, 4. 5kw

9. Weight: Weight: 2000kg

10. Dimension: 9000 x 900 x 1300 (mm)

11. The counting range: 0-999999 (full- -automatic)
